

# LPVM™ Low Pressure Vapor Nozzle

Droplet	Ave.10-15μm
Air pattern	Vortex type
Atomizing method	External mixing
Pattern size	Dia.20-30mm
Atomizing air pressure	150-600kPa

## Dry Assist Pattern Nozzle

Dual curtain vortex air flow enhances spray droplet atomization as well as liquid drying speeds on substrates to minimize non-uniformity during the drying process.  
(Note: The “drying” referenced in this statement is not curing.)
